STALLION™... the only air lines you'll need for the next 3-years

A 3-YEAR WARRANTY – the best value in the industry

In a world full of uncertainty, isn't it nice to know that some products reliably perform as promised. Imagine how much time and money you will save during the next three years if your air lines are not an annual concern. The down-time savings alone mean more time where it counts...on the road. That's the STALLION™ promise!

What makes STALLION™ outperform every other air line on the market? In addition to its anti-kinking design, STALLION™ air lines are made of a patented compound that delivers a reinforced, dual stage wall that is twice as thick as Nylon air lines.

So, unless your travels take you to conditions more challenging than the Arctic or more hostile than Death Valley at the peak of summer, you will not need to consider your air lines for quite some time to come.

STALLION™ Power Air Lines

Twice the thickness of ordinary air lines • Reinforced sidewalls

- Double the Wall Thickness of Nylon Brands
- Corrosion Proof Armor Guard™
- Anti-kinking Design Ensures Safety
- Prevents Wear & Tear on Tires
- Superior, Long Term Coil Memory
